# At the Computer

Please choose the most appropriate answer for each sentence.

**Q1** Without the right software I'm afraid you can't ..... that particular program.

- A reach                      B access                      C obtain                      D find

**Q2** The aim of the office manager is to ..... enough room on the building plans so that each employee can have space for a personal computer.

- A arrange                      B accord                      C allocate                      D organize

**Q3** Remember that before you leave your workstation, always ..... your computer.

- A shut out                      B shut up                      C shut in                      D shut down

**Q4** It's quite easy if you want to find folders and files on the computer, all you do is click here and it immediately starts .....

- A seeking                      B searching                      C looking                      D checking

**Q5** I have tried and tried again and again and no matter what I do it still shows "error" - I just can't ..... what's wrong.

- A look out                      B check out                      C figure out                      D bring out

**Q6** I spent hours writing that report and checking all the information was correct and then without thinking I pressed the ..... button.

- A 'destroy'                      B 'delete'                      C 'deface'                      D 'deny'

**Q7** It's a really clever piece of software because it enables you to ..... on your screen all the information in columns.

- A illustrate                      B depict                      C display                      D delineate

**Q8** Unfortunately this program is not ..... with the operating system on my computer.

- A amicable                      B compatible                      C adaptable                      D amenable

**Q9** When you see that particular symbol on the screen, you have to take that as a ..... that something is wrong.

- A indicating                      B checking                      C briefing                      D warning

**Q10** With this program you can always check your spelling and grammar and if you don't want to accept what it shows, you simply press .....

- A 'ignore'                      B 'quit'                      C 'leave'                      D 'forget'

# Basic Electronics

Please choose the most appropriate answer for each sentence.

**Q1** Electronics is the study and utilization of systems that function by guiding electron flow in ..... such as semiconductors.

- A contrivances                      B devices                      C pieces                      D servers

**Q2** Designing and building electronic circuits to solve ..... problems is the mandate of electronics engineering.

- A parallel                      B practical                      C partial                      D production

**Q3** Research into innovative semiconductor technology and applications is considered a ..... of physics.

- A branch                      B responsibility                      C segment                      D subsidiary

**Q4** Electronic circuits are mainly used to control, process and distribute information, and for the ..... and distribution of electric power.

- A commutation                      B contamination                      C conversation                      D conversion

**Q5** These two purposes rely on the creation and detection of electromagnetic ..... and electrical currents.

- A fields                      B floors                      C grounds                      D surfaces

**Q6** The rapid modern advancement of electronics began in ..... with the introduction of the radio.

- A earnest                      B enthusiasm                      C secret                      D sincerity

**Q7** There are three divisions to an electronics system, an example of which is a television .....

- A box                      B case                      C kit                      D set

**Q8** First, the input is a broadcast signal either received by its antenna or ..... in through a cable.

- A cued                      B fed                      C led                      D sped

**Q9** Second, processing circuits inside the TV ..... the brightness, colour and audio data from this signal.

- A contract                      B detract                      C extract                      D retract

**Q10** Third and last, its output apparatus, a cathode ray tube, changes the electronic signals into a ..... image on its screen.

- A vague                      B valuable                      C viable                      D visible

# Cellular Telephones

Please choose the most appropriate answer for each sentence.

**Q1** All ..... the world, cellular telephones are being used more and more.

- A about                      B around                      C in                      D past

**Q2** Cell phones are hand- ..... devices; they are also called wireless or mobile phones.

- A carried                      B crafted                      C held                      D made

**Q3** Cell phones are ..... with users because they are small, light and easily transported.

- A common                      B famous                      C popular                      D well-liked

**Q4** Cellular telephones are actually little different than two- ..... radios.

- A channel                      B party                      C path                      D way

**Q5** A caller speaks into a cell phone, and it picks ..... his or her voice, transforming the sound into radio waves.

- A at                      B out                      C over                      D up

**Q6** Then these radio waves are transmitted through the atmosphere until they meet a ..... base station.

- A near                      B nearby                      C nearly                      D neighborhood

**Q7** The station sends your phone call ..... the standard telephone network, where it eventually reaches the receiver.

- A among                      B around                      C at                      D through

**Q8** Cell phones provide a vast array of ..... these days, and new ones are being added all the time.

- A buttons                      B customers                      C duties                      D functions

**Q9** When someone calls you, your cell phone receiver ..... radio waves sent out by the base station.

- A collects                      B detects                      C elects                      D selects

**Q10** Inside your cell phone, these waves are converted ..... into the sound of the caller's voice.

- A back                      B backward                      C forth                      D forward

# Computers 1

Please choose the most appropriate answer for each sentence.

**Q1** My computer is not capable of saving material on a separate ..... because it has no floppy drive.

- A space                                      B compact                                      C disc                                      D place

**Q2** I understand that I can make it possible for both my computers to share the same programs by means of .....

- A joining                                      B connecting                                      C linking                                      D networking

**Q3** I had only had my computer for three weeks when I had to have the hard drive .....

- A replaced                                      B restored                                      C retaken                                      D revived

**Q4** Laptop computers are becoming more and more ..... in the business world.

- A famous                                      B popular                                      C sought                                      D wished

**Q5** You have to have a really ..... mind in order to get your head round some of today's computing technology.

- A acute                                      B cut                                      C razor                                      D sharp

**Q6** The great advantage of having an external zip drive is that you can use it as an extra means of .....

- A hoarding                                      B keeping                                      C holding                                      D storage

**Q7** They tried very hard to install the new components on the computer but the language in the manual was too ..... for them to understand.

- A technical                                      B technique                                      C technician                                      D technically

**Q8** When you look at the modern office today you could compare the changes with those that took place in the industrial ..... in the 19th century.

- A revolt                                      B revolution                                      C revolting                                      D revolving

**Q9** In order to ..... the method by which staff pay is calculated the company has bought a new software package.

- A facile                                      B facility                                      C factual                                      D facilitate

**Q10** Obviously a computer can take all the hard work out of ..... a large mass of data.

- A proceeding                                      B procedure                                      C processing                                      D processes

## Cyber-criminals and Cyber-crime

Please choose the most appropriate answer for each sentence.

**Q1** For the past several years we have seen a big change in cyber-crime; although the ..... number of crimes has risen considerably substantially, that is not the complete story.

- A sharp                      B sheer                      C stark                      D straight

**Q2** Just increasing the quantities of manpower and money that a company throws ..... this problem is no longer sufficient to keep pace with all the changes.

- A after                      B at                      C to                      D (none)

**Q3** Cyber-criminals, along with the cyber-crimes that they ....., are constantly evolving, and our approaches and methods must also change in order to guard our company from this new wave.

- A penetrate                      B permeate                      C perpetrate                      D perpetuate

**Q4** Only a few years ago, cyber-criminals were primarily young male nerds doing it as an experiment or just for fun; they were not ..... profit from their efforts but just wanted to impress their girlfriends or peers.

- A out for                      B out to                      C up for                      D up to

**Q5** They were not trying to cause major disruptions or steal money; changing the company website logo was acceptable, but crashing the entire system and then ..... money to restore it was unthinkable.

- A expending                      B exploiting                      C extorting                      D extracting

**Q6** In those days, hackers were just earning bragging rights and boosting their egos; the activity was only a ..... or two up the intellectual ladder from train-spotting.

- A notch                      B peg                      C rung                      D spoke

**Q7** Nowadays, the hackers' primary targets are e-commerce websites and their customer databases, and their operations are so ..... that stolen data is misused within seconds of its being entered by the unwitting victims.

- A slack                      B slick                      C slippery                      D sly

**Q8** Today, e-commerce's main growth area is in replacing traditional telephone-based or over-the-counter transactions with web-based applications, and of course hackers have ..... onto this.

- A latched                      B legged                      C lighted                      D lobbed

**Q9** Now at the disposal of cyber-criminals are all the resources of organised crime, which knows that police forces globally are ..... under-resourced for attacking internet fraud.

- A wickedly                      B willfully                      C woefully                      D worriedly

**Q10** Efforts need to be focused on the building of secure applications that cannot be .....

- A accessed                      B broached                      C compromised                      D firewalled

# Data Mining

Please choose the most appropriate answer for each sentence.

**Q1** Data mining, the extraction of hidden ..... information from large databases, is a powerful new technology with great potential to help companies focus on the most important information in their data warehouses.

- A predictive                      B preventive                      C proactive                      D provocative

**Q2** Data mining tools estimate future trends and behaviors, allowing businesses to make knowledge-..... decisions.

- A driven                      B laden                      C loaded                      D ridden

**Q3** The automated, prospective analyses offered by data mining move beyond the analyses of past events provided by ..... tools typical of decision support systems.

- A introspective                      B intuitive                      C reminiscent                      D retrospective

**Q4** Data mining tools can answer business questions that traditionally were too time-consuming to resolve; they ..... databases for hidden patterns, finding information that experts may miss because it lies outside their expectations.

- A scale                      B scoop                      C score                      D scour

**Q5** Data mining derives its name from the similarities between searching for valuable business information in a large database - for example, finding linked products in gigabytes of store scanner data - and mining a mountain for a ..... of valuable ore.

- A furrow                      B streak                      C trough                      D vein

**Q6** Both processes require either ..... through an immense amount of material, or intelligently probing it to find exactly where the value resides.

- A paging                      B sifting                      C threading                      D weaving

**Q7** Data mining tools sweep through databases and identify previously hidden patterns like ..... data that could represent data entry keying errors.

- A anadromous                      B analogous                      C anomalous                      D anonymous

**Q8** The technique that is used to perform these feats in data mining is called modeling, and this act of model building is something that people have been doing for a long time, certainly before the ..... of computers or data mining technology.

- A access                      B advent                      C ascent                      D avowal

**Q9** If someone told you that he had a good model to predict customer usage, the first thing you might try would be to ask him to apply his model to your customer ....., where you already knew the answer.

- A base                      B drive                      C file                      D log

**Q10** With data mining, the best way to accomplish this is by setting aside some of your data in a ..... to isolate it from the mining process; once the mining is complete, the results can be tested against the isolated data to confirm the model's validity.

A cell

B disk

C folder

D vault

# Database Management Systems

Please choose the most appropriate answer for each sentence.

**Q1** An organisation uses a computer to store and process information because it hopes for speed, accuracy, efficiency, economy etc. beyond what could be achieved using clerical methods; the objectives of using a DBMS must in ..... be the same although the justifications may be more indirect.

- A essence                      B quality                      C spirit                      D substance

**Q2** Early computer applications were based on existing clerical methods and stored information was ..... in much the same way as manual files.ed

- A parsed                      B partitioned                      C petitioned                      D pigeon-holed

**Q3** But the computer's processing speed gave a potential for relating data from different sources to produce valuable management information, provided that some standardisation could be imposed over departmental boundaries: the idea emerged of the ..... database as a central resource.

- A individualized                      B integrated                      C intercalated                      D isolated

**Q4** Data is captured as close as possible to its point of origin and transmitted to the database, then ..... by anyone within the organisation who requires it.

- A exacted                      B extended                      C extracted                      D extruded

**Q5** However many ..... have become attached to this idea in practice, it still provides possibly the strongest motivation for the introduction of a DBMS in large organisations.

- A codicils                      B contingencies                      C postulates                      D provisos

**Q6** A DBMS gives some protection against change by taking care of basic storage and retrieval functions in a standard way, leaving the applications developer to concentrate on specific organisational requirements; changes in one of these areas need not have ..... elsewhere.

- A repercussions                      B resistance                      C resonance                      D reverberations

**Q7** In general a DBMS is a substantial piece of software, the result of many man-years of effort, but because its development costs are spread over a number of purchasers it can probably provide more facilities than would be economic in ..... product.

- A a cut-and-dried                      B a made-to-measure                      C an off-the-rack                      D a one-off

**Q8** The points discussed above are probably most relevant to the larger organisation using a DBMS for its administrative functions, the environment in which the idea of databases first originated; in other ..... the convenience of a DBMS may be the primary consideration.

- A contents                      B contests                      C contexts                      D contretemps

**Q9** The purchaser of a small business computer needs all the software to run it in package form, written so that the minimum of expertise is required to use it, and the same applies to departments (e.g. Research & Development) with special needs which cannot be ..... by a large centralised system.

- A fortified                      B gratified                      C qualified                      D satisfied

**Q10** When comparing database management systems it is obvious that some are designed in the expectation that professional DP staff will be available to run them, while others are aimed at the total .....

A apprentice

B novice

C recruit

D trainee

## Failing in IT

Please choose the most appropriate answer for each sentence.

**Q1** Shamus McGillicuddy writes that it's OK to fail: Every year, Hollywood studios release movies that ..... at the box office.

- A bomb                      B dive                      C plod                      D squander

**Q2** Record companies ..... albums no one wants to play.

- A etch                      B force                      C press                      D seal

**Q3** The auto industry introduces cars that ..... - remember the Ford Edsel?

- A flood                      B gas                      C pump                      D tank

**Q4** Businesses in every vertical industry take risks when they .....; when they try something new, they know there's a chance for failure.

- A initiate                      B innovate                      C realize                      D renovate

**Q5** But in information technology, CIOs rarely feel they have the ..... room to fail.

- A breathing                      B learning                      C living                      D standing

**Q6** CIOs need to ..... back when their companies expect a 100% success rate, said Tom Halbouty, vice president and CIO of Pioneer Natural Resources.

- A draw                      B hit                      C pull                      D push

**Q7** When a project fails, put the failure within a context that a company understands; at Pioneer, IT project failures can be compared to the number of wells drilled that came up ..... - plenty!

- A cold                      B dry                      C empty                      D flat

**Q8** He said if he tries to create a system that creates animated ..... of underwater drilling projects and puts them out on the Web for his worldwide users to use, he has to expect some risk.

- A duplications                      B restorations                      C stimulations                      D visualizations

**Q9** "No one has done it before, and I'm not sure I'm going to pull it ....., " he said.

- A off                      B on                      C out                      D over

**Q10** John F. Cole, CIO of Kansas City, Mo.-based Midwest Consulting Group Inc., agreed with Halbouty's notion that CIOs must be prepared for the occasional failure; but on the ..... side, Cole said CIOs should also be sure they are communicating the successes.

- A B                      B flip                      C off                      D other

# Global Information Systems

Please choose the most appropriate answer for each sentence.

**Q1** An information system can be defined as a set of interrelated components working together to collect, store, ....., process, and disseminate information for the purpose of facilitating planning, control, coordination, and decision making in businesses and other organisations (Laudon & Laudon, 1993).

- A recollect                      B resort                      C restore                      D retrieve

**Q2** Therefore, a global information system is an expansion of an information system that operates across geographical and time .....

- A aspects                      B boundaries                      C factors                      D limits

**Q3** In addition, Palvia et al. have also defined the global information system as "a computerised system which ..... the business strategy of a multinational organisation and deals with components of the international market as a single market and not as individual markets" (Palvia et al., 1992).

- A designs                      B displays                      C supports                      D sustains

**Q4** In a traditional business information system, the set of interrelated components are usually referred to as hardware, software, data, processes, and people (Shelly, 2001); however, it is necessary to consider a few additional components that are significant to information systems in the global .....

- A context                      B hypertext                      C pretext                      D subtext

**Q5** Functional architecture ..... all business functions covered in a global information system and defines important concepts and relationships among the components (Treese & Stewart, 1998); it is needed to allow flexibility for the development of the system in the future.

- A refines                      B reviews                      C specializes                      D specifies

**Q6** In a global environment, computer systems no longer consist of a single large computer servicing an organisation's needs; instead, multiple computers are used to manage and process information, and ideally, the various computers should function and be managed as a single system with the processing distributed ..... the computers.

- A across                      B along                      C through                      D within

**Q7** The essential components of network architecture are compatible hardware and software; by ..... with the telephone system - for two households to communicate, they must use telephones that operate on the same electrical principles, with the same cabling system (hardware), and speaking the same language (software).

- A alignment                      B analogy                      C comparison                      D contrast

**Q8** The design of any network architecture is often based upon the OSI (Open Systems Interconnect) seven-layer network model (Day and Zimmermann, 1983) that was ..... by the International Standards Organisation.

- A amplified                      B codified                      C ratified                      D signified

**Q9** Groupware technology is technology designed to ..... the work of groups; this technology can be applied to communicate, cooperate, coordinate, solve problems, compete, or negotiate.

- A ameliorate                      B delegate                      C escalate                      D facilitate

**Q10** Although management seems to be a political perspective, the organisation could be in trouble if there is no proper management scheme that oversees the operation of the GIS; global information system management can be seen as the ..... for closing the gaps between the global information system and the global business strategy.

A bridge

B gate

C plank

D thread

# Information Security

Please choose the most appropriate answer for each sentence.

**Q1** The US Nuclear Regulatory Commission must protect classified and sensitive unclassified non-safeguards information (SUNSI) related to U.S. government programs for the physical protection and safeguarding of nuclear materials or facilities to ensure that such information is protected against unauthorized .....

- A disclaimer                      B disclosure                      C entrance                      D exposure

**Q2** The lowest level of classified information is Confidential; the ..... higher is Secret, and the highest is Top Secret. Confidential and Secret information will also be either NSI or RD and may be marked C-NSI or S-RD, for example.

- A more                      B next                      C second                      D (none)

**Q3** Classified information at the NRC is of two types: National Security Information classified by an Executive Order, whose compromise would cause some degree of ..... to national security; and Restricted Data classified by the Atomic Energy Act, whose compromise would assist in the design, manufacture or utilization of nuclear weapons.

- A breach                      B cleft                      C damage                      D slippage

**Q4** Some classified material at NRC and at the facilities it regulates is classified by other government agencies, and the NRC is not ..... to declassify such information without the permission of the originating agency.

- A emboldened                      B empowered                      C recommended                      D restricted

**Q5** Access to classified information requires a personnel security clearance (NRC 'Q' or 'L') equal to or higher than the level of information and a .....-to-know.

- A have                      B need                      C right                      D want

**Q6** Procedures for obtaining an NRC facility security clearance for ..... regulated by the Commission are contained in 10 CFR Part 95; procedures in 10 CFR Part 25 apply to persons who may require access to classified information related to a license or to a certificate, or to an applicant for a license or certificate.

- A alliances                      B allies                      C enemies                      D entities

**Q7** NRC contractors who require access to classified information are subject to security terms and conditions as specified in ..... commitments.

- A conditional                      B contractual                      C negotiable                      D notarized

**Q8** Safeguards Information is a special category of sensitive unclassified information authorized by Section 147 of the Atomic Energy Act to be protected; while SGI is considered to be sensitive unclassified information, its handling and protection more closely ..... the handling of classified Confidential information.

- A mimic                      B monitor                      C recall                      D resemble

**Q9** Sensitive unclassified non-safeguards information (SUNSI) is information that is generally not publicly available and ..... a wide variety of categories (e.g., personnel privacy, attorney-client privilege, confidential source, etc.)

- A encapsulates                      B encompasses                      C engenders                      D envelopes

**Q10** Information about a licensee's physical protection or material control and accounting program for special nuclear material not otherwise ..... as Safeguards Information or classified as National Security Information or Restricted Data is required by 10 CFR 2.390 to be protected in the same manner as commercial or financial information.

- A designated       B designed       C prepared       D presented

# IT Project Failures

Please choose the most appropriate answer for each sentence.

**Q1** According to M Bronte-Stewart, IT projects have a bad reputation for going over budget and schedule, not ..... expectations and for providing poor return on investment (Clegg et al, 1997; Keil et al, 1998; Fielding, 2002; The Register, 2002; Jaques, 2004).

- A performing                      B producing                      C raising                      D realising

**Q2** Planning and organising projects, selecting suitable software and hardware, and designing effective websites are important business decisions, yet firms often do not take adequate precautions or advice before making ..... of faith, spending large sums of money on inappropriate, unwanted or badly implemented IT systems.

- A acts                      B bonds                      C leaps                      D light

**Q3** Many large IT systems contracts are in dispute or have been suspended: a project to replace the British Army, Navy and Air Force inventory systems with a single system was ..... to a halt after 130m had been spent.

- A brought                      B down                      C led                      D steered

**Q4** The more IT projects are seen to go wrong, the more the public learns to expect problems and delays, the more developers may think that much of their work is likely to be a waste of effort, and the more those holding the ..... strings may view any IT project as a worry and probably a poor return on investment.

- A apron                      B draw                      C purse                      D shoe

**Q5** IT staff can become ....., lose goodwill and fail to accept or follow the advice of managers: for all these reasons we should be looking for ways to reduce the incidence and effects of failure.

- A cynical                      B ironical                      C sarcastical                      D satirical

**Q6** The OASIG (1996), a DTI-supported special interest group concerned with the organisational aspects of IT, interviewed a group of leading researchers and consultants who between them had over 900 years of professional work in the field, and were ..... on the experiences of over 14,000 organisations.

- A banking                      B borrowing                      C drawing                      D leaning

**Q7** The report to the UK's Economic and Social Research Council published the following ..... findings on the eventual outcomes of IT projects: 80% to 90% do not meet their goals, 80% are delivered late and over budget, and 40% fail or are abandoned.

- A disgusting                      B dissenting                      C distracting                      D disturbing

**Q8** The report went on to suggest some of the main reasons why IT projects seem to fail; one is that the Management agenda is too limited in that most IT investments are technology ..... and the main investment motive is only to cut costs.

- A coloured                      B edged                      C filled                      D led

**Q9** It is alarming that significant numbers of IT projects still fail to deliver benefits on time, within budget and ..... expectations; a great deal of the 24 billion or so being spent on IT each year in the UK (BCS 2004) is being wasted.

- A as                      B for                      C to                      D (none)

**Q10** One way to improve this situation is to carry out a risk estimation exercise that gives a standardised ....., so that the process can be discussed and focussed on important characteristics; results can be compared and users can build up an expertise of experience in evaluating projects' potential for success.

A blueprint

B mandate

C paradigm

D template

## My computer and me

Please choose the most appropriate answer for each sentence.

**Q1** I just don't get on with computers ..... all.

- A by                                      B at                                      C in                                      D with

**Q2** They always go ..... with me and break down.

- A incorrect                              B false                                      C wrong                                      D inaccurate

**Q3** As a result of this I find I have to call ..... experts to come and help me.

- A out                                      B over                                      C about                                      D up

**Q4** When they come to my house, these experts, they show me what I ..... do.

- A should                                      B ought                                      C might                                      D may

**Q5** As I watch them, everything becomes very ..... and I understand everything.

- A correct                                      B clear                                      C light                                      D lighted

**Q6** The trouble is that as soon as they leave, I tend to ..... everything they have told me.

- A ignore                                      B erase                                      C forget                                      D deny

**Q7** The best piece of ..... someone gave me when the computer doesn't work was to turn the computer off, have a cup of coffee and then turn it on again.

- A counsel                                      B council                                      C recommendation                                      D advice

**Q8** The first time I ..... this, everything was fine for five minutes and then it stopped working again.

- A tried                                      B endeavoured                                      C experimented                                      D experienced

**Q9** I have now bought a new computer which is perfect because it's very small and so doesn't take up much .....

- A area                                      B position                                      C room                                      D place

**Q10** It looks very smart and modern but I do have one ..... problem and that's because I don't know how to switch it on.

- A spacious                                      B major                                      C size                                      D significant

# Object-Oriented Programming Languages

Please choose the most appropriate answer for each sentence.

**Q1** Many modern programming languages depend largely or exclusively on the concept of objects: a close ..... binding of data to the operations that can be performed upon that data.

- A automatic                      B enigmatic                      C pragmatic                      D syntactic

**Q2** In these Object-Oriented languages - C++, C#, Java, Eiffel, Smalltalk, Visual Basic.NET, Perl, and many others programmers create classes, each of which defines the behavior and structure of a number of similar objects; then they write code that creates and ..... objects that are instances of those classes.

- A articulates                      B eradicates                      C generates                      D manipulates

**Q3** One reason why objects are a powerful programming technique - the reason most often ..... in the early literature on Object-Oriented Programming - is that programmatic objects map naturally to real world objects.

- A flouted                      B routed                      C scouted                      D touted

**Q4** This mapping between objects in the real world and more ..... code objects encourages programmers to think in the problem domain, rather than in computer science terms.

- A abstract                      B abstruse                      C oblique                      D obtuse

**Q5** This benefit has perhaps been overstated, however; unless you're building a simulator of a real-world process, such ..... 'real-world' objects form just the surface of your system.

- A profligate                      B spectral                      C surrogate                      D virtual

**Q6** The complexity of your design lies underneath that surface, in code that reflects business rules, resource allocation, algorithms, and other computer science concerns; if you only use objects to reflect the real world, you ..... yourself with a lot of work.

- A bilk                      B fool                      C leave                      D set

**Q7** Coupling refers to the ways in which and degrees to which one part of the system relies on the details of another part: the tighter the coupling, the more changes in one part of the system will ..... throughout the system, while with loose coupling, the interfaces between subsystems are well defined and restricted.

- A leak                      B ripple                      C seep                      D wander

**Q8** ..... refers to the degree in which elements within a subsystem form a single, unified concept, with no excess elements: where it is strong, there is easier comprehension and thus more reliable code.

- A Adaptation                      B Adherence                      C Cohabitation                      D Cohesion

**Q9** Some Object-Oriented languages are less rigid than others in how much they require you to design around objects, but OO languages certainly support these quality ..... if you take the time to pursue them.

- A attributes                      B contributions                      C tribulations                      D tributes

**Q10** It seems that every new OO language author ..... the need to distinguish their language by coming up with new terminology.

A feels

B gets

C senses

D urges

## Real Life: Telecommunications (1)

Please choose the most appropriate answer for each sentence.

**Q1** Prior to ....., only one company offered telephone services in the United States. Now, there are many companies to choose from that offer reasonable telephone service rates.

- A disaggregation      B disillusionment      C deregulation      D decoupling

**Q2** I got charged a long-distance ..... for a call to a friend three miles away. I tried to fight it but the telephone company said that he is part of a different network and they won't reverse the charges. What a rip-off!

- A toll      B fee      C debenture      D credit

**Q3** I am getting my phone ..... up at the beginning of next week. Until then, you can call my parents and they will give me the message.

- A fixed      B jacked      C linked      D hooked

**Q4** AT&T used to have a ..... over the telephone industry until deregulation. One could only get service from them. They are still one of the largest telephone companies but they aren't the only service provider anymore.

- A jurisdiction      B ownership      C monopoly      D ruling

**Q5** Hi, Operator. I would like to ..... a call to an old army friend of mine who lives in St. Louis. If I give you his name, can you look up his telephone number and connect me to him?

- A place      B construct      C create      D link

**Q6** I want to go into the ..... field once I am done with school. I want to work with either a telephone company or an internet service provider. The work seems interesting, the pay is good and one can find work in a lot of nice locations.

- A teleconferencing      B telecommunications      C teleporting      D telepathy

**Q7** Please hold that thought, Karen. I want to hear what you have to say but I have to go ..... my telephone quickly. I am expecting an important call.

- A recall      B meet      C answer      D join

**Q8** Did you check the answering machine? You did? Were there any ..... for me that I need to respond to tonight?

- A novels      B transcriptions      C statements      D messages

**Q9** That jerk. When I called the company to explain that they billed us incorrectly, he refused to take the charge off of the bill. When I tried to argue that we never ordered the services that appeared on the bill, he ..... up on me.

- A close      B shut      C clicked      D hung

**Q10** Bruce? I am sorry to interrupt. I have a call on the other line. Will you please ..... for a moment?

- A stay      B suspend      C break      D hold

## Real Life: Telecommunications (2)

Please choose the most appropriate answer for each sentence.

**Q1** Hi Honey, I am just calling to say I love you quickly and will call back later. I have a ..... call I have to be on in ten minutes. The manager from each division will be a part of it as will the CEO. I've got to go now and prepare for it.

- A communal                      B group                      C conference                      D meeting

**Q2** You are going to the beach today? I am not sure if I can come. Will you have your ..... phone on while you are out there? I will call you in a few hours on it and let you know if I can meet you there.

- A wireless                      B cell                      C mobility                      D land

**Q3** Thanks for your cell phone number. Do you have a land ..... as well? If you do, I can get a hold of you or at least leave a message if your phone battery is dead.

- A wire                      B drive                      C receiver                      D line

**Q4** You tried to call my cell phone earlier? Sorry, I didn't get your call. I was hiking in the woods and my phone didn't get any ..... there.

- A reception                      B waves                      C operation                      D digits

**Q5** Unfortunately, I don't know the telephone number for my auto mechanic right off hand. I'll give you his name and you'll have to look him up in the ..... pages to get his number.

- A yellow                      B green                      C red                      D direct

**Q6** I don't have any change either for the pay phone. Why don't you try to give your parents a ..... call? I am sure they will accept the charges. I am sure they will have a jack for your car so we can change the tire.

- A collect                      B credit                      C owe                      D reverse

**Q7** How many ..... do you get with your cell phone plan? I only get 300 and I usually run out of them within two weeks and then I can't use my cell phone until the new monthly billing period starts.

- A calls                      B hours                      C minutes                      D messages

**Q8** You don't need change to call this tow-truck. They have a 1-..... number listed in the phone book so you can call them for free.

- A 800                      B 700                      C 900                      D 770

**Q9** I am glad the tow-truck has a .....-free number available; otherwise, we'd be in trouble. I have no change and no phone card.

- A call                      B toll                      C money                      D economy

**Q10** I don't have my cell phone anymore; they ..... it off last week since I didn't pay my bill for the last two months. Here is my parents' number. They can get a message to me.

- A closed                      B broke                      C let                      D shut

## Real Life: The Internet and Websites (1)

Please choose the most appropriate answer for each sentence.

**Q1** I was wondering, Mike, which Internet ..... is better if you want to use it to stream video content?" Russell asked. Mike replied, "I use either Google Chrome or Mozilla Firefox. Either works fine for watching shows online."

- A mouse                      B wire                      C browser                      D ticker

**Q2** "What do you think of the introduction to our company that I added to our website?" Bill asked Tom. Tom replied, "I like the font you chose for it but I think you have to edit the ..... again. I like the word usage in it but you have some English errors to correct."

- A painting                      B content                      C marker                      D cursive

**Q3** Copyright ..... is a major threat to companies who sell goods on an international level. There are lots of countries that are either unwilling or unable to enforce copyright protection regarding intellectual property. As a result, there are a lot of fake copies sold and misrepresented by groups that are completely separate from the companies that made the original products in the first place.

- A infringement                      B antagonism                      C privacy                      D precedence

**Q4** Companies that offer email services are doing a much better job of blocking unwanted advertisements from reaching my email account. I used to spend almost an hour a day deleting ..... from my mail box.

- A spam                      B eggs                      C bacon                      D brownies

**Q5** Would you send that short video to my email again in a different .....? I don't have a program that can read that type of file so I can't open it.

- A arrangement                      B landscape                      C format                      D shape

**Q6** I can never remember all of my different ..... I have to write them down and that kind of defeats the whole purpose. Companies make it too hard for a person to remember each one since some must have numbers, some have to have special characters in them and some can't have any of those things.

- A systems                      B landmarks                      C maps                      D passwords

**Q7** Hillary! Your computer had a very dangerous Trojan infection in it! Luckily, we caught this or you might have lost all of your files or could have had your identity taken. Before I leave, I will install an anti - ..... program on your computer and that will protect it from these infections.

- A bacteria                      B virus                      C insect                      D spider

**Q8** I am glad that I finally switched to online ..... Paying bills is so much faster over the Internet and transferring money between accounts is so easy! I also like being able to check my balance from home.

- A switching                      B wiring                      C mailing                      D banking

**Q9** Oh, my computer is running so slow right now. It's all these ..... that it constantly needs to get and install. Installing these takes up a lot of my processor power and it's annoying since it takes longer to get my work done. I guess I should be thankful for them since my computer will stay current but it's still irritating.

- A announcements                      B updates                      C letters                      D uploads

**Q10** I know a lot of people like the older version of the spreadsheet program but I like the new one. It is very user - ..... I didn't have to take a special class to figure out how to use it and I can find the majority of its features while using it and without having to pull out the instruction manual.

A compatible

B nice

C congruent

D friendly

## Real Life: The Internet and Websites (2)

Please choose the most appropriate answer for each sentence.

**Q1** You currently have all the newest programs. The reason your computer is running so slow is that you have old ..... You may have to buy more physical memory, a new video card, and, perhaps, a bigger hard drive if you want your computer to run faster.

- A wires                      B software                      C warehouses                      D hardware

**Q2** Our lab has managed to invent some really fast microchips for our computers. Our biggest problem now is that we have to create ..... that can operate with the new speed and make the computers do things that regular, slower models can't.

- A hardware                      B software                      C cookies                      D emails

**Q3** My friend is a computer ..... He makes new software programs. People with this job sure make a lot of money. I graduated college with a degree in economics. I thought I would start my first job making more money than my friends but this friend makes twenty-thousand dollars a year more than I do.

- A builder                      B coder                      C fabricator                      D programmer

**Q4** We just got our company ..... up and running. Now people can view and order our products over the Internet, as well as find out about our hours and location.

- A website                      B protocol                      C code                      D hardware

**Q5** I teach English as a second language over the Internet. Because I use video as well as audio devices, I have to pay for a high-..... Internet connection since I am transmitting a lot of information at one time.

- A noise                      B speed                      C tinsel                      D precision

**Q6** My friend got a ..... in his system and it destroyed his hard disk drive. Not only did he lose all of his work and personal information, he lost a perfectly good disk drive.

- A parakeet                      B turtle                      C vampire                      D worm

**Q7** I just ran a cleaning program on my computer. I like that the program frees up more space on my system but I hate how it deletes all the ..... on my computer. Now the bank doesn't recognize my computer and I have to remember the answers to all those security questions.

- A cookies                      B brownies                      C cakes                      D candy bars

**Q8** I am learning how to design Internet websites. I just learned how to add additional web ..... to the main website. If I keep learning at this pace, I may be able to get a good job creating websites by this time next year.

- A pages                      B chapters                      C editions                      D departments

**Q9** We just got our business website up and running and we were able to buy the ..... name we wanted. Our website address has our business name it along with.com at the end.

- A map                      B jurisdiction                      C domain                      D area

**Q10** I think companies that use ..... to track consumer behavior should be liable for damages to people's personal property. The programs that report back to the company about what sites you have been on make your computer run slower. If I pay for a fast computer and your company makes it slower, shouldn't I be paid the difference between the price of a cheaper, slower computer and the one I bought?

A harvesters

B agents

C informers

D spyware

## Real Life: The Internet and Websites (3)

Please choose the most appropriate answer for each sentence.

**Q1** We just upgraded our Internet from dial-up service to ..... Internet service. This service is much faster and allows me to move my computer anywhere and I'm not tied to the area around the jack.

- A cordless                      B wireless                      C copper-free                      D connection-free

**Q2** Our phone service runs over our cable-modem. Unlike traditional phone service, ....., which stands for Voice Over Internet Protocol, is cheaper because we don't have to pay for long-distance calls or other features like call-waiting.

- A VVIP                      B VONP                      C VOIP                      D ERTL

**Q3** "Honey, what is your ..... ID? I need to access your online credit account to pay your bill and I only know your password," Jason said to Kylie.

- A login                      B network                      C station                      D cubicle

**Q4** Do you check your ..... account everyday? I don't but I need to start doing that. I get messages that need to be answered within an hour or two and I don't end up reading them until several days later.

- A data mail                      B software mail                      C email                      D computer

**Q5** Are you done with that part of your report yet? I still have to put the group paper together and ..... so it looks nice before we turn it in to the professor. This will take a few hours so I need you to be done with your part by noon.

- A brush                      B macro                      C format                      D code

**Q6** Now, to open the program on your computer, you need to put the cursor over the program icon and double ..... it.

- A punch                      B pound                      C clinch                      D click

**Q7** What is the fastest Internet connection one can get around here? Is it DSL, wireless, or ..... internet?

- A pulley                      B chain                      C wire                      D cable

**Q8** I am looking for a new web-..... company to use for my website. Our old one just went out of business. Do you have a company you can recommend?

- A hosting                      B governing                      C enabling                      D grabbing

**Q9** I turned in the paperwork necessary to get a ..... for the new program I created. I am guessing it will take about a month so I can be ready to sell the program as soon as my intellectual property is protected.

- A copy editor                      B copyright                      C copy license                      D invention

**Q10** You may have a computer ..... if your system is running really slow and the computer can't pull up a lot of your information. These things are signs that point to an infection.

- A cold                      B disease                      C flu                      D virus

## Real Life: The Internet and Websites (4)

Please choose the most appropriate answer for each sentence.

**Q1** Downloading refers to the ..... of data from a larger mechanism to a smaller computer like they one you might have at home.

- A obliteration                      B transferring                      C destruction

**Q2** When surfing the Internet, people usually prefer high-..... connections because these types of connections are very fast and are able to download and upload information easily and quickly.

- A bandwidth                      B handy                      C run

**Q3** A ..... is a device that transfers information to and from your personal computer through a cable or telephone line. In North America, Internet connections via cable lines are very fast; however, telephone connections are relatively slow.

- A modem                      B microphone                      C meter

- A finance                      B commerce                      C money

**Q5** In the past, people sent letters to others through the mail/postal service. However, since the advent of the Internet, people can now send e-..... to others very quickly. The messages are sent by the click of a button and arrive to the recipient's inbox almost instantly.

- A couriers                      B mails                      C letters

**Q6** One of the first internet connections, and the slowest, when compared to cable or wireless connections, is called .....

- A dial-on                      B dial-in                      C dial-up

**Q7** In order to get to a specific internet site without using an internet search engine, one must know the website's .....

- A location                      B address                      C destination

**Q8** In order to allow multiple computers in the same area access to the same Internet connection, people often use wireless .....

- A routers                      B pathways                      C maps

**Q9** Google is one of the most popular and user-friendly internet search .....

- A motors                      B drivers                      C engines

**Q10** The American government is still wrestling with how to stop people from ..... music from the internet illegally.

- A draining                      B downloading                      C siphoning

# System security

Please choose the most appropriate answer for each sentence.

**Q1** Due to a malfunction in the online security system, the database was left open and ..... to attack.  
 A palpable                      B negotiable                      C vulnerable                      D operable

**Q2** The customers' information was hijacked and ..... to a rival company.  
 A on sold                      B undersold                      C oversold                      D sold

**Q3** After the company's data records mysteriously went missing overnight, new password protection programs were .....  
 A implemented                      B illustrated                      C instilled                      D instigated

**Q4** The computer hacker paid his fellow worker ..... money not to speak to anyone about his criminal activities.  
 A hush                      B calm                      C silent                      D quiet

**Q5** By day, the accountant went about his work in a professional manner. No one suspected that at night, he was ..... the books.  
 A logging                      B cooking                      C drawing                      D overturning

**Q6** According to ..... theory, the longer a password is, the more difficult it is to guess. Unfortunately this also makes it more difficult to remember!  
 A compatible                      B constructive                      C convenient                      D contemporary

**Q7** Patents do not protect a product from being duplicated. Many countries simply do not ..... patent laws.  
 A recognise                      B regale                      C neglect                      D discover

**Q8** The PR company hoped that by ..... potential employees to personality profiling tests, they would discover if any candidates were untrustworthy.  
 A instructing                      B submitting                      C demanding                      D attending

**Q9** ..... wisdom holds that one should upload new files only if they have been checked with virus-detection software.  
 A Concise                      B Convivial                      C Conventional                      D Correctional

**Q10** The man's employment ..... were not good. He had a criminal record for credit card fraud.  
 A prospects                      B negotiations                      C applications                      D negations

## Telecommunications (1)

Please choose the most appropriate answer for each sentence.

**Q1** A telephone ..... or provider is a company that provides telephone services both local and long-distance to customers.

- A install                      B message                      C carrier                      D call

**Q2** In the US, there is a lot of ..... in the telecommunication field now so telephone service prices have come down in the past twenty years. Many companies are trying hard to get and keep customers.

- A message                      B competition                      C number                      D page

**Q3** We pay a monthly service fee and, in our plan, we are able to make an ..... amount of local calls per month. That means that we can call anyone and talk for as long as we want so long as they live in the specified vicinity.

- A limited                      B unlimited                      C long-distance                      D installed

**Q4** I just moved and I have to get my phone .....-up soon. Luckily, I have my cell phone but the rates are really pricey during the day.

- A deregulated                      B answered                      C called                      D hooked

**Q5** I need to get a ..... carrier soon. I want to call my parents on a regular basis and I can't call them with my regular, local package because they live on the west coast and we're on the east coast.

- A long-distance                      B message                      C local                      D voicemail

**Q6** I'm going to get ..... soon so that people can leave me messages on my landline if I'm not home. I hate not knowing who called and, this way, I'll be able to respond to calls left by anyone who chooses to leave me a message.

- A cordless                      B voicemail                      C cable                      D fees

**Q7** I'm also going to get call-..... thrown into my phone package. That way, if I'm on the phone with someone, I'll hear a sound and know that someone else is trying to reach me. All you have to do is press one button to put the first caller on hold in order to answer the second caller who is trying to get through. Modern conveniences are great.

- A mobile                      B waiting                      C local                      D hook-up

**Q8** I want to buy a ..... phone so that I can walk around my house and talk on the phone at the same time. I don't like being confined to my desk and the telephone cord is so short.

- A monopoly                      B collect                      C package                      D cordless

**Q9** I'm in the process of hooking-up my phone service. The telephone company is sending a technician out today to ..... my landline. I can't wait to have a phone again!

- A fee                      B cable                      C install                      D hang-up

**Q10** Why didn't you ..... me a message? I didn't even know that you called. Please leave a note the next time you call so that I don't miss any urgent matters.

- A leave                      B miss                      C turn                      D call

# The LS9203 Omni-Directional Presentation Scanner

Please choose the most appropriate answer for each sentence.

**Q1** With stiff competition and commodity price constraints, service is your greatest .....: that means fast checkout and stocking what your customers want.

- A delineator                      B determiner                      C differentiator                      D discriminator

**Q2** Your instincts are good, but it's still a guessing ..... to match your inventory with customers' preferences, because you have no way to precisely track what they're buying.

- A game                      B play                      C quiz                      D trick

**Q3** Retailers with stores of all sizes are overcoming these challenges by transforming their business processes, abandoning paper-based sales and inventory tracking for electronic data ..... systems.

- A cache                      B capture                      C content                      D cover

**Q4** While mobile technologies offer new ways to effectively manage inventory and ..... retail operations, complex and expensive systems may not fit the needs of your organization.

- A blueline                      B mainline                      C skyline                      D streamline

**Q5** Instead, you need a tool that's affordable, reliable, integrates into your .....-of-sale (POS) environment easily and can be used without extensive training.

- A place                      B point                      C port                      D post

**Q6** Symbol's easy-to-use LS9203 omni-directional scanner speeds checkout and improves sales and inventory management in retail operations where ..... space is limited.

- A cashier                      B control                      C counter                      D customer

**Q7** Designed to work as both a presentation and handheld scanner, the LS9203 enables your employees to scan bar codes hands-....., as well as bring the scanner to the merchandise to quickly scan several items at once and avoid lifting heavy products.

- A free                      B full                      C off                      D on

**Q8** With automated scanning, you eliminate pricing errors caused by manual input mistakes, reduce profit-eroding shrinkage and discourage '.....' by requiring a manager's approval before offering special deals for friends and relatives.

- A befriending                      B dreamboating                      C lovebirding                      D sweethearting

**Q9** With increased ..... into what your customers are buying, you encourage repeat business by providing the products your customers want, when they want them.

- A veritability                      B versatility                      C viability                      D visibility

**Q10** And the LS9203's small ..... leaves you enough space to set up product displays at the checkout counter, so your customers are able to easily pick up last-minute items.

- A footfall                      B footpad                      C footprint                      D footstand

## ANSWERS: At the Computer

**Q1** Without the right software I'm afraid you can't ..... that particular program.

**B** access

**Q2** The aim of the office manager is to ..... enough room on the building plans so that each employee can have space for a personal computer.

**C** allocate

**Q3** Remember that before you leave your workstation, always ..... your computer.

**D** shut down

**Q4** It's quite easy if you want to find folders and files on the computer, all you do is click here and it immediately starts .....

**B** searching

**Q5** I have tried and tried again and again and no matter what I do it still shows "error" - I just can't ..... what's wrong.

**C** figure out

**Q6** I spent hours writing that report and checking all the information was correct and then without thinking I pressed the ..... button.

**B** 'delete'

**Q7** It's a really clever piece of software because it enables you to ..... on your screen all the information in columns.

**C** display

**Q8** Unfortunately this program is not ..... with the operating system on my computer.

**B** compatible

**Q9** When you see that particular symbol on the screen, you have to take that as a ..... that something is wrong.

**D** warning

**Q10** With this program you can always check your spelling and grammar and if you don't want to accept what it shows, you simply press .....

**A** 'ignore'

## ANSWERS: Basic Electronics

**Q1** Electronics is the study and utilization of systems that function by guiding electron flow in ..... such as semiconductors.

**B** devices

**Q2** Designing and building electronic circuits to solve ..... problems is the mandate of electronics engineering.

**B** practical

**Q3** Research into innovative semiconductor technology and applications is considered a ..... of physics.

**A** branch

**Q4** Electronic circuits are mainly used to control, process and distribute information, and for the ..... and distribution of electric power.

**D** conversion

**Q5** These two purposes rely on the creation and detection of electromagnetic ..... and electrical currents.

**A** fields

**Q6** The rapid modern advancement of electronics began in ..... with the introduction of the radio.

**A** earnest

**Q7** There are three divisions to an electronics system, an example of which is a television .....

**D** set

**Q8** First, the input is a broadcast signal either received by its antenna or ..... in through a cable.

**B** fed

**Q9** Second, processing circuits inside the TV ..... the brightness, colour and audio data from this signal.

**C** extract

**Q10** Third and last, its output apparatus, a cathode ray tube, changes the electronic signals into a ..... image on its screen.

**D** visible

## ANSWERS: Cellular Telephones

**Q1** All ..... the world, cellular telephones are being used more and more.

**B** around

**Q2** Cell phones are hand- ..... devices; they are also called wireless or mobile phones.

**C** held

**Q3** Cell phones are ..... with users because they are small, light and easily transported.

**C** popular

**Q4** Cellular telephones are actually little different than two- ..... radios.

**D** way

**Q5** A caller speaks into a cell phone, and it picks ..... his or her voice, transforming the sound into radio waves.

**D** up

**Q6** Then these radio waves are transmitted through the atmosphere until they meet a ..... base station.

**B** nearby

**Q7** The station sends your phone call ..... the standard telephone network, where it eventually reaches the receiver.

**D** through

**Q8** Cell phones provide a vast array of ..... these days, and new ones are being added all the time.

**D** functions

**Q9** When someone calls you, your cell phone receiver ..... radio waves sent out by the base station.

**B** detects

**Q10** Inside your cell phone, these waves are converted ..... into the sound of the caller's voice.

**A** back

## ANSWERS: Computers 1

**Q1** My computer is not capable of saving material on a separate ..... because it has no floppy drive.

C disc

**Q2** I understand that I can make it possible for both my computers to share the same programs by means of .....

D networking

**Q3** I had only had my computer for three weeks when I had to have the hard drive .....

A replaced

**Q4** Laptop computers are becoming more and more ..... in the business world.

B popular

**Q5** You have to have a really ..... mind in order to get your head round some of today's computing technology.

D sharp

**Q6** The great advantage of having an external zip drive is that you can use it as an extra means of .....

D storage

**Q7** They tried very hard to install the new components on the computer but the language in the manual was too ..... for them to understand.

A technical

**Q8** When you look at the modern office today you could compare the changes with those that took place in the industrial ..... in the 19th century.

B revolution

**Q9** In order to ..... the method by which staff pay is calculated the company has bought a new software package.

D facilitate

**Q10** Obviously a computer can take all the hard work out of ..... a large mass of data.

C processing

## ANSWERS: Cyber-criminals and Cyber-crime

**Q1** For the past several years we have seen a big change in cyber-crime; although the ..... number of crimes has risen considerably substantially, that is not the complete story.

**B** sheer

**Q2** Just increasing the quantities of manpower and money that a company throws ..... this problem is no longer sufficient to keep pace with all the changes.

**B** at

**Q3** Cyber-criminals, along with the cyber-crimes that they ....., are constantly evolving, and our approaches and methods must also change in order to guard our company from this new wave.

**C** perpetrate

**Q4** Only a few years ago, cyber-criminals were primarily young male nerds doing it as an experiment or just for fun; they were not ..... profit from their efforts but just wanted to impress their girlfriends or peers.

**B** out to

**Q5** They were not trying to cause major disruptions or steal money; changing the company website logo was acceptable, but crashing the entire system and then ..... money to restore it was unthinkable.

**C** extorting

**Q6** In those days, hackers were just earning bragging rights and boosting their egos; the activity was only a ..... or two up the intellectual ladder from train-spotting.

**C** rung

**Q7** Nowadays, the hackers' primary targets are e-commerce websites and their customer databases, and their operations are so ..... that stolen data is misused within seconds of its being entered by the unwitting victims.

**B** slick

**Q8** Today, e-commerce's main growth area is in replacing traditional telephone-based or over-the-counter transactions with web-based applications, and of course hackers have ..... onto this.

**A** latched

**Q9** Now at the disposal of cyber-criminals are all the resources of organised crime, which knows that police forces globally are ..... under-resourced for attacking internet fraud.

**C** woefully

**Q10** Efforts need to be focused on the building of secure applications that cannot be .....

**C** compromised

## ANSWERS: Data Mining

**Q1** Data mining, the extraction of hidden ..... information from large databases, is a powerful new technology with great potential to help companies focus on the most important information in their data warehouses.

A predictive

**Q2** Data mining tools estimate future trends and behaviors, allowing businesses to make knowledge-..... decisions.

A driven

**Q3** The automated, prospective analyses offered by data mining move beyond the analyses of past events provided by ..... tools typical of decision support systems.

D retrospective

**Q4** Data mining tools can answer business questions that traditionally were too time-consuming to resolve; they ..... databases for hidden patterns, finding information that experts may miss because it lies outside their expectations.

D scour

**Q5** Data mining derives its name from the similarities between searching for valuable business information in a large database - for example, finding linked products in gigabytes of store scanner data - and mining a mountain for a ..... of valuable ore.

D vein

**Q6** Both processes require either ..... through an immense amount of material, or intelligently probing it to find exactly where the value resides.

B sifting

**Q7** Data mining tools sweep through databases and identify previously hidden patterns like ..... data that could represent data entry keying errors.

C anomalous

**Q8** The technique that is used to perform these feats in data mining is called modeling, and this act of model building is something that people have been doing for a long time, certainly before the ..... of computers or data mining technology.

B advent

**Q9** If someone told you that he had a good model to predict customer usage, the first thing you might try would be to ask him to apply his model to your customer ....., where you already knew the answer.

A base

**Q10** With data mining, the best way to accomplish this is by setting aside some of your data in a ..... to isolate it from the mining process; once the mining is complete, the results can be tested against the isolated data to confirm the model's validity.

D vault

## ANSWERS: Database Management Systems

**Q1** An organisation uses a computer to store and process information because it hopes for speed, accuracy, efficiency, economy etc. beyond what could be achieved using clerical methods; the objectives of using a DBMS must in ..... be the same although the justifications may be more indirect.

A essence

**Q2** Early computer applications were based on existing clerical methods and stored information was ..... in much the same way as manual files.ed

B partitioned

**Q3** But the computer's processing speed gave a potential for relating data from different sources to produce valuable management information, provided that some standardisation could be imposed over departmental boundaries: the idea emerged of the ..... database as a central resource.

B integrated

**Q4** Data is captured as close as possible to its point of origin and transmitted to the database, then ..... by anyone within the organisation who requires it.

C extracted

**Q5** However many ..... have become attached to this idea in practice, it still provides possibly the strongest motivation for the introduction of a DBMS in large organisations.

D provisos

**Q6** A DBMS gives some protection against change by taking care of basic storage and retrieval functions in a standard way, leaving the applications developer to concentrate on specific organisational requirements; changes in one of these areas need not have ..... elsewhere.

A repercussions

**Q7** In general a DBMS is a substantial piece of software, the result of many man-years of effort, but because its development costs are spread over a number of purchasers it can probably provide more facilities than would be economic in ..... product.

D a one-off

**Q8** The points discussed above are probably most relevant to the larger organisation using a DBMS for its administrative functions, the environment in which the idea of databases first originated; in other ..... the convenience of a DBMS may be the primary consideration.

C contexts

**Q9** The purchaser of a small business computer needs all the software to run it in package form, written so that the minimum of expertise is required to use it, and the same applies to departments (e.g. Research & Development) with special needs which cannot be ..... by a large centralised system.

D satisfied

**Q10** When comparing database management systems it is obvious that some are designed in the expectation that professional DP staff will be available to run them, while others are aimed at the total .....

**B** novice

## ANSWERS: Failing in IT

**Q1** Shamus McGillicuddy writes that it's OK to fail: Every year, Hollywood studios release movies that ..... at the box office.

A bomb

**Q2** Record companies ..... albums no one wants to play.

C press

**Q3** The auto industry introduces cars that ..... - remember the Ford Edsel?

D tank

**Q4** Businesses in every vertical industry take risks when they .....; when they try something new, they know there's a chance for failure.

B innovate

**Q5** But in information technology, CIOs rarely feel they have the ..... room to fail.

A breathing

**Q6** CIOs need to ..... back when their companies expect a 100% success rate, said Tom Halbouty, vice president and CIO of Pioneer Natural Resources.

D push

**Q7** When a project fails, put the failure within a context that a company understands; at Pioneer, IT project failures can be compared to the number of wells drilled that came up ..... - plenty!

B dry

**Q8** He said if he tries to create a system that creates animated ..... of underwater drilling projects and puts them out on the Web for his worldwide users to use, he has to expect some risk.

D visualizations

**Q9** "No one has done it before, and I'm not sure I'm going to pull it ....., " he said.

A off

**Q10** John F. Cole, CIO of Kansas City, Mo.-based Midwest Consulting Group Inc., agreed with Halbouty's notion that CIOs must be prepared for the occasional failure; but on the ..... side, Cole said CIOs should also be sure they are communicating the successes.

B flip

## ANSWERS: Global Information Systems

**Q1** An information system can be defined as a set of interrelated components working together to collect, store, ....., process, and disseminate information for the purpose of facilitating planning, control, coordination, and decision making in businesses and other organisations (Laudon & Laudon, 1993).

**D** retrieve

**Q2** Therefore, a global information system is an expansion of an information system that operates across geographical and time .....

**B** boundaries

**Q3** In addition, Palvia et al. have also defined the global information system as "a computerised system which ..... the business strategy of a multinational organisation and deals with components of the international market as a single market and not as individual markets" (Palvia et al., 1992).

**C** supports

**Q4** In a traditional business information system, the set of interrelated components are usually referred to as hardware, software, data, processes, and people (Shelly, 2001); however, it is necessary to consider a few additional components that are significant to information systems in the global .....

**A** context

**Q5** Functional architecture ..... all business functions covered in a global information system and defines important concepts and relationships among the components (Treese & Stewart, 1998); it is needed to allow flexibility for the development of the system in the future.

**D** specifies

**Q6** In a global environment, computer systems no longer consist of a single large computer servicing an organisation's needs; instead, multiple computers are used to manage and process information, and ideally, the various computers should function and be managed as a single system with the processing distributed ..... the computers.

**A** across

**Q7** The essential components of network architecture are compatible hardware and software; by ..... with the telephone system - for two households to communicate, they must use telephones that operate on the same electrical principles, with the same cabling system (hardware), and speaking the same language (software).

**B** analogy

**Q8** The design of any network architecture is often based upon the OSI (Open Systems Interconnect) seven-layer network model (Day and Zimmermann, 1983) that was ..... by the International Standards Organisation.

**B** codified

**Q9** Groupware technology is technology designed to ..... the work of groups; this technology can be applied to communicate, cooperate, coordinate, solve problems, compete, or negotiate.

**D** facilitate

**Q10** Although management seems to be a political perspective, the organisation could be in trouble if there is no proper management scheme that oversees the operation of the GIS; global information system management can be seen as the ..... for closing the gaps between the global information system and the global business strategy.

**A** bridge

## ANSWERS: Information Security

**Q1** The US Nuclear Regulatory Commission must protect classified and sensitive unclassified non-safeguards information (SUNSI) related to U.S. government programs for the physical protection and safeguarding of nuclear materials or facilities to ensure that such information is protected against unauthorized .....

**B** disclosure

**Q2** The lowest level of classified information is Confidential; the ..... higher is Secret, and the highest is Top Secret. Confidential and Secret information will also be either NSI or RD and may be marked C-NSI or S-RD, for example.

**B** next

**Q3** Classified information at the NRC is of two types: National Security Information classified by an Executive Order, whose compromise would cause some degree of ..... to national security; and Restricted Data classified by the Atomic Energy Act, whose compromise would assist in the design, manufacture or utilization of nuclear weapons.

**C** damage

**Q4** Some classified material at NRC and at the facilities it regulates is classified by other government agencies, and the NRC is not ..... to declassify such information without the permission of the originating agency.

**B** empowered

**Q5** Access to classified information requires a personnel security clearance (NRC 'Q' or 'L') equal to or higher than the level of information and a .....-to-know.

**B** need

**Q6** Procedures for obtaining an NRC facility security clearance for ..... regulated by the Commission are contained in 10 CFR Part 95; procedures in 10 CFR Part 25 apply to persons who may require access to classified information related to a license or to a certificate, or to an applicant for a license or certificate.

**D** entities

**Q7** NRC contractors who require access to classified information are subject to security terms and conditions as specified in ..... commitments.

**B** contractual

**Q8** Safeguards Information is a special category of sensitive unclassified information authorized by Section 147 of the Atomic Energy Act to be protected; while SGI is considered to be sensitive unclassified information, its handling and protection more closely ..... the handling of classified Confidential information.

**D** resemble

**Q9** Sensitive unclassified non-safeguards information (SUNSI) is information that is generally not publicly available and ..... a wide variety of categories (e.g., personnel privacy, attorney-client privilege, confidential source, etc.)

**B** encompasses

**Q10** Information about a licensee's physical protection or material control and accounting program for special nuclear material not otherwise ..... as Safeguards Information or classified as National Security Information or Restricted Data is required by 10 CFR 2.390 to be protected in the same manner as commercial or financial information.

**A** designated

## ANSWERS: IT Project Failures

**Q1** According to M Bronte-Stewart, IT projects have a bad reputation for going over budget and schedule, not ..... expectations and for providing poor return on investment (Clegg et al, 1997; Keil et al, 1998; Fielding, 2002; The Register, 2002; Jaques, 2004).

D realising

**Q2** Planning and organising projects, selecting suitable software and hardware, and designing effective websites are important business decisions, yet firms often do not take adequate precautions or advice before making ..... of faith, spending large sums of money on inappropriate, unwanted or badly implemented IT systems.

C leaps

**Q3** Many large IT systems contracts are in dispute or have been suspended: a project to replace the British Army, Navy and Air Force inventory systems with a single system was ..... to a halt after 130m had been spent.

A brought

**Q4** The more IT projects are seen to go wrong, the more the public learns to expect problems and delays, the more developers may think that much of their work is likely to be a waste of effort, and the more those holding the ..... strings may view any IT project as a worry and probably a poor return on investment.

C purse

**Q5** IT staff can become ....., lose goodwill and fail to accept or follow the advice of managers: for all these reasons we should be looking for ways to reduce the incidence and effects of failure.

A cynical

**Q6** The OASIG (1996), a DTI-supported special interest group concerned with the organisational aspects of IT, interviewed a group of leading researchers and consultants who between them had over 900 years of professional work in the field, and were ..... on the experiences of over 14,000 organisations.

C drawing

**Q7** The report to the UK's Economic and Social Research Council published the following ..... findings on the eventual outcomes of IT projects: 80% to 90% do not meet their goals, 80% are delivered late and over budget, and 40% fail or are abandoned.

D disturbing

**Q8** The report went on to suggest some of the main reasons why IT projects seem to fail; one is that the Management agenda is too limited in that most IT investments are technology ..... and the main investment motive is only to cut costs.

D led

**Q9** It is alarming that significant numbers of IT projects still fail to deliver benefits on time, within budget and ..... expectations; a great deal of the 24 billion or so being spent on IT each year in the UK (BCS 2004) is being wasted.

C to

**Q10** One way to improve this situation is to carry out a risk estimation exercise that gives a standardised ....., so that the process can be discussed and focussed on important characteristics; results can be compared and users can build up an expertise of experience in evaluating projects' potential for success.

**D** template

## ANSWERS: My computer and me

**Q1** I just don't get on with computers ..... all.

**B** at

**Q2** They always go ..... with me and break down.

**C** wrong

**Q3** As a result of this I find I have to call ..... experts to come and help me.

**D** up

**Q4** When they come to my house, these experts, they show me what I ..... do.

**A** should

**Q5** As I watch them, everything becomes very ..... and I understand everything.

**B** clear

**Q6** The trouble is that as soon as they leave, I tend to ..... everything they have told me.

**C** forget

**Q7** The best piece of ..... someone gave me when the computer doesn't work was to turn the computer off, have a cup of coffee and then turn it on again.

**D** advice

**Q8** The first time I ..... this, everything was fine for five minutes and then it stopped working again.

**A** tried

**Q9** I have now bought a new computer which is perfect because it's very small and so doesn't take up much .....

**C** room

**Q10** It looks very smart and modern but I do have one ..... problem and that's because I don't know how to switch it on.

**B** major

# ANSWERS: Object-Oriented Programming Languages

**Q1** Many modern programming languages depend largely or exclusively on the concept of objects: a close ..... binding of data to the operations that can be performed upon that data.

D syntactic

**Q2** In these Object-Oriented languages - C++, C#, Java, Eiffel, Smalltalk, Visual Basic.NET, Perl, and many others programmers create classes, each of which defines the behavior and structure of a number of similar objects; then they write code that creates and ..... objects that are instances of those classes.

D manipulates

**Q3** One reason why objects are a powerful programming technique - the reason most often ..... in the early literature on Object-Oriented Programming - is that programmatic objects map naturally to real world objects.

D touted

**Q4** This mapping between objects in the real world and more ..... code objects encourages programmers to think in the problem domain, rather than in computer science terms.

A abstract

**Q5** This benefit has perhaps been overstated, however; unless you're building a simulator of a real-world process, such ..... 'real-world' objects form just the surface of your system.

C surrogate

**Q6** The complexity of your design lies underneath that surface, in code that reflects business rules, resource allocation, algorithms, and other computer science concerns; if you only use objects to reflect the real world, you ..... yourself with a lot of work.

C leave

**Q7** Coupling refers to the ways in which and degrees to which one part of the system relies on the details of another part: the tighter the coupling, the more changes in one part of the system will ..... throughout the system, while with loose coupling, the interfaces between subsystems are well defined and restricted.

B ripple

**Q8** ..... refers to the degree in which elements within a subsystem form a single, unified concept, with no excess elements: where it is strong, there is easier comprehension and thus more reliable code.

D Cohesion

**Q9** Some Object-Oriented languages are less rigid than others in how much they require you to design around objects, but OO languages certainly support these quality ..... if you take the time to pursue them.

A attributes

**Q10** It seems that every new OO language author ..... the need to distinguish their language by coming up with new terminology.

**A** feels

## ANSWERS: Real Life: Telecommunications (1)

**Q1** Prior to ....., only one company offered telephone services in the United States. Now, there are many companies to choose from that offer reasonable telephone service rates.

**C** deregulation

**Q2** I got charged a long-distance ..... for a call to a friend three miles away. I tried to fight it but the telephone company said that he is part of a different network and they won't reverse the charges. What a rip-off!

**B** fee

**Q3** I am getting my phone ..... up at the beginning of next week. Until then, you can call my parents and they will give me the message.

**D** hooked

**Q4** AT&T used to have a ..... over the telephone industry until deregulation. One could only get service from them. They are still one of the largest telephone companies but they aren't the only service provider anymore.

**C** monopoly

**Q5** Hi, Operator. I would like to ..... a call to an old army friend of mine who lives in St. Louis. If I give you his name, can you look up his telephone number and connect me to him?

**A** place

**Q6** I want to go into the ..... field once I am done with school. I want to work with either a telephone company or an internet service provider. The work seems interesting, the pay is good and one can find work in a lot of nice locations.

**B** telecommunications

**Q7** Please hold that thought, Karen. I want to hear what you have to say but I have to go ..... my telephone quickly. I am expecting an important call.

**C** answer

**Q8** Did you check the answering machine? You did? Were there any ..... for me that I need to respond to tonight?

**D** messages

**Q9** That jerk. When I called the company to explain that they billed us incorrectly, he refused to take the charge off of the bill. When I tried to argue that we never ordered the services that appeared on the bill, he ..... up on me.

**D** hung

**Q10** Bruce? I am sorry to interrupt. I have a call on the other line. Will you please ..... for a moment?

**D** hold

## ANSWERS: Real Life: Telecommunications (2)

**Q1** Hi Honey, I am just calling to say I love you quickly and will call back later. I have a ..... call I have to be on in ten minutes. The manager from each division will be a part of it as will the CEO. I've got to go now and prepare for it.

**C** conference

**Q2** You are going to the beach today? I am not sure if I can come. Will you have your ..... phone on while you are out there? I will call you in a few hours on it and let you know if I can meet you there.

**B** cell

**Q3** Thanks for your cell phone number. Do you have a land ..... as well? If you do, I can get a hold of you or at least leave a message if your phone battery is dead.

**D** line

**Q4** You tried to call my cell phone earlier? Sorry, I didn't get your call. I was hiking in the woods and my phone didn't get any ..... there.

**A** reception

**Q5** Unfortunately, I don't know the telephone number for my auto mechanic right off hand. I'll give you his name and you'll have to look him up in the ..... pages to get his number.

**A** yellow

**Q6** I don't have any change either for the pay phone. Why don't you try to give your parents a ..... call? I am sure they will accept the charges. I am sure they will have a jack for your car so we can change the tire.

**A** collect

**Q7** How many ..... do you get with your cell phone plan? I only get 300 and I usually run out of them within two weeks and then I can't use my cell phone until the new monthly billing period starts.

**C** minutes

**Q8** You don't need change to call this tow-truck. They have a 1-..... number listed in the phone book so you can call them for free.

**A** 800

**Q9** I am glad the tow-truck has a .....-free number available; otherwise, we'd be in trouble. I have no change and no phone card.

**B** toll

**Q10** I don't have my cell phone anymore; they ..... it off last week since I didn't pay my bill for the last two months. Here is my parents' number. They can get a message to me.

**D** shut

## ANSWERS: Real Life: The Internet and Websites (1)

**Q1** I was wondering, Mike, which Internet ..... is better if you want to use it to stream video content?" Russell asked. Mike replied, "I use either Google Chrome or Mozilla Firefox. Either works fine for watching shows online."

**C** browser

**Q2** "What do you think of the introduction to our company that I added to our website?" Bill asked Tom. Tom replied, "I like the font you chose for it but I think you have to edit the ..... again. I like the word usage in it but you have some English errors to correct."

**B** content

**Q3** Copyright ..... is a major threat to companies who sell goods on an international level. There are lots of countries that are either unwilling or unable to enforce copyright protection regarding intellectual property. As a result, there are a lot of fake copies sold and misrepresented by groups that are completely separate from the companies that made the original products in the first place.

**A** infringement

**Q4** Companies that offer email services are doing a much better job of blocking unwanted advertisements from reaching my email account. I used to spend almost an hour a day deleting ..... from my mail box.

**A** spam

**Q5** Would you send that short video to my email again in a different .....? I don't have a program that can read that type of file so I can't open it.

**C** format

**Q6** I can never remember all of my different ..... I have to write them down and that kind of defeats the whole purpose. Companies make it too hard for a person to remember each one since some must have numbers, some have to have special characters in them and some can't have any of those things.

**D** passwords

**Q7** Hillary! Your computer had a very dangerous Trojan infection in it! Luckily, we caught this or you might have lost all of your files or could have had your identity taken. Before I leave, I will install an anti - ..... program on your computer and that will protect it from these infections.

**B** virus

**Q8** I am glad that I finally switched to online ..... Paying bills is so much faster over the Internet and transferring money between accounts is so easy! I also like being able to check my balance from home.

**D** banking
